

The 18xx games are in order of starting from p2 onwards. Railway Rivals RR2530VS is on p8 & p9, Outpost M20 is on p10, St. Petersburg M8 is on p11. The Games That You Play is on p12.

New Games: None. And none in danger of starting soon. Except maybe a Railway Rivals.

A yawning chasm of white space lies before me. It does not need to be filled for me to achieve harmony and balance. Which prompts me to wonder if my chakras need any maintenance. However, I should probably get round to vacuuming my floors before I worry about that.

Oh yes, I resorted to a superficial internet trawl for something to fill the void. I found that image that you see above up there. And if you are concerned that my random rambling is a sign of oncoming dementia, then please be assured that I have been like this for all my life.

The OR15 operating order is - NYC, Erie, CPR, NYNH, PRR, B&O, B&M, C&O.

The LNWR leaves receivership and the GCR enters receivership. The LBSC receives votes of confidence.

The Receiver cannot have the GCR build through the mountain to Manchester until the GCR earnings are sufficient to pay off that cost by the end of its run. The Receiver can worry that the last type 10 tile will be placed - by the LNWR, GWR, GNR or GER before it has a chance to do so. In OR13, the Receiver will preferably lay a type 6 tile at its home base of L7 linking to L6 & K8. In OR14 it will hope that it can lay a type 10 tile on K8 and if it cannot then it will hope to promote L7 to be a type 15.

The Receiver worries less about the LSWR. The Receiver will try to promote and place a base at (preferably) D9 and possibly C10. But rather than a base at C10 it would prefer to have a route north so if it cannot promote a station it will try to promote E9. Objections to this promotion of E9 can be lodged and will stand (unless the LSWR then has a route to E9).

Having said all the above - by request, we stop after OR13 next time.

Last time I gave VR 30 points for winning run 7.1 - despite correctly showing 20 in the run result. VR's score has been reduced accordingly. This time, if something is in italics it indicates that whilst the intent of your orders was obvious - but I disagreed with them as regards a detail.

This time VR's entries included both the shortest and longest routes of the round. Most runs were hotly contested and there were three dead heats - including a three-way tie for first place. The biggest earner was MRR with all others in close contact with each other. VR remains in first place despite the docking of unwarranted points.
