And that's it. John S' dump of the SxE resulted in the WtE not being train bound and its cash - combined with that of the SxE - could be spent on a new 6+6 which removed the 3+3 trains and reduced Tony S' earnings sufficiently for John S to prevail as winner. Meanwhile earnings for John W, as well as Don, are stunted and David nabs third place with John W just that elusive 6M behind him. Thoughts?

GAMESTART

You are ... in dealing order ... Tony Bromley, Don Smith, John Shelley, David Hooton, John Webley.

This is a Half Thompson game. So ... the rules are as published [2nd Edition - English translation by John Webley] but ...

- The whole Start Packet is available at once.
- The dealing order is 1234554321123.
- When the Start Packet has been sold the ByE and SxE are available.
- Once all the ByE and SxE have been bought then the WtE, BaE & HeE all become available.
- After all the WtE, BaE & HeE have been bought the MsE & OIE are available.
- The PrE shares are available after a share in one of the WtE, BaE & HeE has been bought.

Okay, you each have the traditional starting money of 390M and an expectation. Go fulfil it ...

1835G28 : HALF THOMPSON GAME

NEXT TIME - SR1

The MsE has to buy a 3 train which is then scrapped when the next company buys a 6 train. So the MsE then buys a 6+6 train which scraps the 3+3 trains. There is still a chunk of cash in the bank - so there are 1 few ORs left in this game ...

The OR3 operating order is - LPS, GT, CA, CPR, GW.

Just the one OR by request - and in any case it is worth stopping to take stock as we have had our first forced nationalisation. The M-V wanted to buy a train from the bank and had R120 credit. The available train was a 3 costing R225 so the maximum two loans was not enough to bridge the gap. The RSR holdings are noted below, but of course it will not operate until the first 4 train is out and about ...

The OR4 operating order is - K-R, M-NN, N, M-K, O-K, StP-W, K-B, R-O, K-K.

SR2 was run by email ... LG +M-V(150), DH +StP-W(150), DR +O-K(125), MS +R-O(120).

This time no 3 trains are bought so no action is possible in SR3. So next we can move on to OR5 and I am also asking for OR6. If anybody wants a pause after OR5 then please advise soonest so the others can be informed. If we do pause after OR5 then the time after I plan to have OR6 with MR1 and SR4.

The OR5 operating order is - N, M-NN, K-B, M-K, K-K, M-V, StP-W, K-R, O-K, R-O.

HOI-SIN's track continues to L62 as reported but is shown as stopping at L61 on the map. Do not be confused.

This time, in run 1 CSR loses out to the length matched GRINCH and in run 2 GITCO, with the longest route, storms into the lead and just keeps ahead of the YAYS:TANG pairing to win against the odds. HOI-SIN rolls in ahead of TANG for run 3 and run 4 goes with length. Without actually checking it seems that TANG pays out the least to run but tends to have a roundabout route.

Over the round TANG, HOI-SIN & GITCO profit whilst the rest have a net not much change.

A muted Trading Cards phase. Then the remaining 4 Workers are revealed leaving two spaces. So even if no Workers are bought we know that the remaining Buildings must come out (and you can work out what they are), so I show them below and next time we will have both the Workers & Buildings phases of the final round of this game ...
