RAILWAY RIVALS RR2154ND

ROUND 5 [6,3,6]

Last time GRaB passed through Schwerin and not Gustrow as reported. This time a couple of hex numbers were changed where apparently mistyped and GRaB's builds were reordered so that they fit the die rolls. GRID, no doubt unintentionally, builds parallel to BEST who only gets the maximum of 10 allowed as payment for a single build.

Building Allowances

The building allowance for each of rounds 1-6 will be derived from three die rolls in the range 3 to 6 with no one round ever having more than one roll of 3. The building allowance in round 7 will be 12 points (plus payments to rivals) and will then decrease by 2 for each subsequent round.

COMMENTS

David H [2nd] Congratulations on Lyndon on his win. He started out very well and never looked back.

David R [3rd] I should have been handily second, if I hadn't have floated the SE too late to make a profit on it, so was narrowly third instead - and was pretty much always going to be dismally not first. Lyndon essentially won this by being the first and main one to realise (and act on) the fact that Converting Minors is really an enormously better idea than Merging them - only hope I can remember it next time ...

1861X27

WON BY LYNDON

David joins Don & John in having a third company - otherwise portfolios are filled out. Next time we will stop after OR11 if the CGR forms in that round - let me know whether you want your companies to join the CGR (if you have choice of course) ...

Well, there's something new to me ... Berlin based Minors building in the south-west and the WtE springing to life with a base in the Ruhr (possibly, known to me better as H2). The BaE does not lay track as the only tile requested was unavailable. Meanwhile all player values are close enough so that I do not know who is winning (but I do know that Tim is leading) ...
