

The 18xx games are on page 2 onwards in order of starting. Railway Rivals RR2154ND is on page 15, Outpost M10 is on Page 16 and In The Year Of The Dragon M1 is on pages 17 & 18.

1835D31 starts below for Mike B, David R, Tony S, John S & John W.

There have been no suggestions for improvements to the reports (web and/or pdf) in response to my offer following the addition of tile sheets linked from the web reports last time. Of course there are many augmentations possible - but I guess there is not one where the lack of it causes any of you sufficient pain to mention it to me. Fair enough - but the offer remains.

This is one of the two times of the year when a TringCon has just happened. This last one was friendly and enjoyable as ever. As usual the fulsome catering generated fears of a national biscuit shortage - but Keith & Valerie are well experienced and had averted such a calamity by prudent & planned purchasing. And this extended to buying two new tables to accommodate the 8 player 18C2C D variant game which has since been discussed on the 18xx Yahoo Group. There are some photos of the event (and that game) at <http://www.fwtwr.com/tringcon/tringcon-xxii.asp>. I am only represented, whilst playing 7 Wonders, by my general crotch area. The first picture of the previous event (<http://www.fwtwr.com/tringcon/tringcon-xxi.asp>) also features that same portion of my body but this time my hands are folded discreetly over said area. But back when I was younger Keith was prepared to show me full on and I can be seen playing Entdecker in the 11th photo of last year's Spring event (<http://www.fwtwr.com/tringcon/tringcon-xx.asp>).

Mark Stretch is holding what could grow to be a similar event in Evesham on Saturday 13th August this year. The day will include a two round diplomacy tournament and summary details can be viewed at <http://ukf2fdip.org/Ad%20Hoc/Evesham%202011.html>. The venue has a licensed bar and there will be "as much tea/coffee as you can drink". Evesham is an attractive town in Worcesterstershire and has the necessary plethora of food outlets. I have previously bought kitchen units (sold by Martin Hammon) and Chinese Relaxing Balls from locations in and around Evesham.

And there is still space to be filled on this page. Even though I abandoned the "a zine abhors white space" principle for the game pages I still feel I ought to fill this first page for some reason. It would be easier if I wanted to proselytise or summat. Nothing like a fevered belief to create spume to fill the pages but I tend to moderate my tendencies in print. And that will do for this time ... the weather today is the best I have seen inland this year so I must get out there and bask in the surprise of blue skies and warm sun ... no doubt to be followed by a realisation of just how much needs to be done in and around the garden ...

GAMESTART

You are ... in dealing order ... Mike Bennett, John Webley, John Shelley, Tony Sait, David Roffey.

And now the traditional recap on just what it means to be playing an 1835 Half-Thompson game. The rules are as published [2nd Edition - English translation by John Webley] except that ...

- The whole Start Packet is available at once.
- The dealing order is 1234554321123.
- When the Start Packet has been sold the ByE and SxE are available.
- Once all the ByE and SxE have been bought then the WtE, BaE & HeE all become available.
- After all the WtE, BaE & HeE have been bought the MsE & OIE are available.
- The PrE shares are available after a share in one of the WtE, BaE & HeE has been bought.

You each start with 390M and a chance of being the victor of this game

1835D31 : HALF THOMPSON GAME

NEXT TIME – SR1

WAITING	1829 South	John S, David R
	1830	Mike R, Tony S
	1835	Don S, George L
	1856	Don S, George L
	1861	Don S, Stephen W

Tony comments "How many ORs are we likely to have before the bank breaks?". I assume that this is in the nature of a rhetorical question. And that the answer is too many except maybe for Tony hoping to overtake Don. But in 1830 there is always the possibility of the unexpected ...

The OR14 operating order is - C&O, B&M, B&O, NYC, PRR, CPR, NYNH, Erie.

Stephen moves from third at the end of OR11 to first at the end of OR12 and consequently wins the game. He built to increase the KBS dividends and also benefitted from the SNCB dividends which had the biggest improvement over last time - but not enough to move John up a place. David H hung on to second place ahead of Mike.

Another quiet, but quite possibly meaningful, session. Oh yes, it's death (or glory) by a thousand cuts. Next time it is evident (by reading the rules) that MR8 will only happen if a 8 has not been purchased during OR11 ... but if it does happen then nothing will happen within it.

I corrected a couple of "obvious typos". Please check the actions reported below - each one was simple enough but I found that I went cross-eyed a couple of times whilst running these two ORs! And during those aforementioned two ORs trains and credit were moved about to help the purchase of all the 3 trains and also the first 4 train. The game is afoot ...

The OR5 operating order is - 1, 2, 3, 6, 7, 8, 10, 12, 13, 14, 15, DR, FS - unless changed by SR2.

There were orders to lay 5 & 6 tiles on a Y hex - I am happy to treat these as "obvious typos" and actually place 201 & 202 tiles in the same orientation. I know this practice can lead to problems if extended too much, but I will be careful. Meanwhile, as you can see, a 3 train was bought in OR3 so we had MR1 and stopped there. Next time I ask to go through to SR3 - let me know if that causes any problems.

The Midland shares are broached but the company is still in waiting. It remains that no director has more than 30% of the company they direct. It may stay that way next time or there may be a break in the dam - I am not the one to know.

So we will do the same sort of thing as last time. We will only have OR4 if there is no change of LNWR, GWR or Midland director in SDR4. So if you are going to make a play for the LSWR or a later company then please provide orders for its operation in OR4

The OR1 operating order is - B&O, PRR.

In the dealing everybody bought at every opportunity except for John who declined the NER offered to him. Next time we will only have OR2 & SDR3 if there are no new or changed directorships in SDR2.

All except Jeff gave votes for the options and all options received at least three votes in favour (and are thus adopted) except for MSK2 (the extra trains) which was tied at two for and two against. The appearance of those trains is far enough away that I can ask Jeff to cast the deciding vote for next time.

In answer to some questions ... the 3T trains are not optional and cost 370 each. The GSWR, Highland & Furness all have 30% president's certificates and each company is (only) available when all new shares of the previous company have been bought. Please advise any further queries.

NEXT - OR1, SDR2, OR2 & SDR3

Run 8 started proceedings with four entrants and they finished in order of increasing length with second placed BEST earning the most. GRaB & GCR were shortest and quickest for run 9, but GRaB was a tad quicker. Run 10 had 5 noisy entrants with GCR & GRaB beating the odds. Run 11 was a quieter affair without drama. GCR was favourite for run 12 but only managed to get second place by one spot from GRID. Length did prevail in the lottery that was run 13 and then GITCO won again in run 14.

Earnings a more evenly distributed this time although nothing went right for GRID. D'MARK stays way out in front but there's plenty of scope for change in his rear.

Building Allowances

The building allowance in round 9 will be 8 points (plus payments to rivals) then down by 2 pts per round.

A brisk round as much production is conserved. Three Moon Bases become available for next time but only Mike & Jeff (given average production) can afford to buy one of them. On the same basis only Dane joins them as able to afford the single proffered Planetary Cruiser whilst there are more potential contenders for the solitary Space Station ...
