

The 18xx games are on page 2 onwards in order of starting, RR2187B is on page 14, RR2188C is below, Outpost M11 is on page 15, St. Petersburg M3 is on page 17 and The Games That You Play is on page 19 along with a photo from the UK Games Expo.

New Games: A new 1861 is starting by email for Pete C, Stephen W, Lyndon G & Mike R. Coming next - the candidates are the 1829 South and (it looks like 4 player) 1830, 1835 or 1856. One more for The Year Of The Dragon which will start when the current St. Petersburg game finishes.

The UK Games Expo was the busiest yet. We took more on my brother's stand on the Saturday than he had done over any previous weekend. And then the Sunday was the best Sunday (in terms of turnover) yet. Next year the expo moves to the Hilton Metropole at the Birmingham NEC and whilst a certain retrospective affection might creep in for the labyrinthine Masonic experience of the Clarendon Suites, it should be a much better venue. Having said that I don't think I would travel far to attend the expo unless I was competing in a tournament (as I assume Lyndon was this year - I just saw him wave as he passed by the throng by the stand) or had a specific purpose like trying out a featured game, stocking up on War Machine miniatures (just mentioned because they had a significant presence at the show) or summat. But we didn't play games in the hotel in the evenings and for a lot of people the expo is simply the catalyst for getting together with friends to socialise and play games.

Okay, that does it for this issue. Delayed due to good weather (already a memory) and weekends away.

ROUND 4 - BUILDS [6,4,3]

GITCO and GRID make unheard of levels of payments to STARR as network paths cross. GRID gets into pole position for San Francisco as STARR devotes & diverts enough effort to stay in pole position for the North-West. The underlined hexes in the M&P builds indicate amendments or clarifications. I think that GITCO's builds will be as Tony expected - the [cut short] bit being caused by text left over from last time.

Building Allowances

The die rolls for each building round will each be in the range 3 to 6 with no more than one 3 per round and a minimum of total build count of 12. No more than one round with a build total of 12 (not happened) and no more than two rounds with a build total of 13 (happened for round 4). Operating rounds builds will start at 12 points in and reduce by 2 per round - with those totals excluding payments to other players

DEADLINE : FRIDAY 22ND JUNE 2012
HOST : ROB THOMASSON

The SECR becomes available but is only wanted as a last resort after David had abandoned the L&YR in favour of the GER. Meanwhile, in earlier news, the LSWR Survey party could not follow the GWR to D7 so one of the closest alternative destinations was randomly substituted.

When a share is in the brown zone a player can either buy all the old shares or a single new share. This is not clear in the rulebook - and is subject to local interpretation and what we have here is the commonly accepted wisdom (he asserted). All shares are now bought ahead of (what I am anticipating will be) the last three operating rounds. Meanwhile the B&O is still just short of credit to open up a route south for the CPR.

The OR16 operating order is - NYNH, B&O, B&M, PRR, CPR, C&O, NYC, Erie.

This time it is just OR14 by request (after the rest of you had sent orders) - OR15 orders on file will be used if not replaced. If you would prefer to split the next two rounds as OR15 then OR16 & SDR12 (rather than OR15 & OR16 then SDR12) then just let me know and copy to the other players.

Both the Highland & Furness debut without laying track and spending nearly as much as they can on a train. A couple of Survey Party moves were amended so that they were legal.

The OIE development is delayed for an OR by the lack of a 9 tile but it does affect the director's second place and the current order could well be the final order - we will probably know for sure next time.

The OR15 operating order is - PrE, ByE, HeE, SxE, MsE, BaE, WtE, OIE.

Last time the WR ran for 120 last and not 130 as reported. Starting cash & credit adjusted to match. This time the last two 5 trains are bought and OR11 could witness the purchase of the first 6 train and the consequent formation of the CGR. So let me know what you will do if you have a company that you could choose to keep out of the CGR by paying off its loans. Also whether you will keep any offered 4 trains if you are appointed as president of the CGR.

The WR & GT had their dividends reduced to pay their loan interest. In a change from my previous practice the run value shown is the, er, run value. The total dividends distributed are that run value less the deductions noted in the relevant notes. Previously I gave that lower total dividend value under "Run" - which now seems to be an unhelpful way of doing it. This new way makes it easier to check that the run value is correct.

Dividends increase all round but the biggest increase goes to the leader and the player order does not change. The game may or may not finish with OR12 - but given that all but one of you have full portfolios I will also ask for SR6 orders for next time. If that proves trickier than I estimate then we can stop at OR12 in any event.

We stop before SR1 at David's request. Special offer - if I receive David's orders soon then I will send out an interim report for SR1 which I imagine will be straightforward once he has seen the track situation. Just keeps the game moving. All other orders used unless an appeal to the contrary is received ...

There is a comprehensive no-show for run 8. BLOT's slight route disadvantage in run 9 is enough for him to place second to BMX but in run 9 his slight route advantage is not enough to avoid second place. Then BLOT is equal second in length in run 10 but does not score. Not so good but not as bad as BRASS who only had this one entry this time and placed fourth. Run 11 was a lottery won by 4Lions with BMX & GRID sharing second. BLOT had another slight route advantage for run 13 and was racing ahead only for GITCO to catch up smartly - but not quite quickly enough so BLOT did win a race this time. The round ended with an uncontested win for GITCO in run 14.

Overall, GITCO earns the most but another steady performance by 4Lions sees him take the lead whilst BRASS languishes.
