

The 18xx games are on page 2 onwards in order of starting except that 1856Y31 is held over. Orders on file from all but Graham & Ian - used next time if not replaced. RR2187B is on page 16, RR2188C is below, Outpost M11 is on page 17, St. Petersburg M3 is on page 18 and The Games That You Play is on page 19.

New Games: 1830F33 starts below. An 1829 South will start next time.

1830V30 & 1835D31 both finish this time with John Shelley as the winner and John Webley in pursuit. Congratulations to both for a brace of good results.

Last time I made a comment about not travelling that far (All The Way To, er, Birmingham) to attend the UK Games Expo (unless certain conditions were met). This rightly piqued the "interest" of David H who had just driven 750 miles each way to get to and from Origins. But as he said, he did get the beautiful scenery of the Allegheny Mountains whilst I had a heaving road works stricken M40. But even given the relative traffic densities we in the UK do rather have a different concept of what constitutes a long way compared to those in the US or, say, Australia.

Meanwhile I will not be at ManorCon this year - for reasons other distance - but of course I trust that all of you that do go will still find a way to enjoy the event. Dig deep and you'll be okay.

1830F33
GAMESTART

You are ... in dealing order ... John Shelley, Mike Ruffhead, Don Smith, Mark Hancock.

If you need anything then let me know, otherwise that's all there is to say. Get on with it.

I can only see a run of 310 - and not 330 as reported - for the C&O in OR15. Starting cash adjusted. John S continues his garrison offensive and runs out as the expected winner. David R has briefly and ruefully commented on the game - printed next time along with any other statements received.

Some operating is done and then all the three companies in the next tranche are floated at the minimum requirement level. So let's have just the one OR next time (expecting an OR & SR the time after).

We pause after MR2 at Stephen's request - orders on file used if not replaced. Remember that there are an unlimited number of 7, 8 & 9 tiles in 1861. I indicate zero availability by "0" in the Tiles table below - the symbol after the 7, 8 & 9 tiles represents my inability/unwillingness to source an infinity symbol.

The OR7 operating order is - N, K-K, O-K, K-B, MKV, SW, MK, NW - unless changed by SR4.

Inevitably, there is a certain kind of symmetrical thing going on as the two non-dealing players in SR1 are the only two that deal in SR2 - both opting to invest in an existing company rather than take on the mantle of president right now.

Okay, how about I ask for orders through to SR4 but say that we will stop after SR3 if any share is sold in that round or if any presidency changes hands (could only be the GW without any sale) or if a 3 train is bought in OR2 (again, could only be the GW).

1856W32 : STANDARD GAME : PHASE 1 : BANK - \$11,270

NEXT TIME - OR2, SR3, OR3 & SR4

Note to spectators - SR1 was run by email and the outcome can be deduced.

A smooth start as would be expected from such a smooth collective. A now a reminder that if you order any action that requires a company to take out a loan (that it is able to take) then I will assume that you were in full command of both the situation and also your faculties and consequently proceed to have the loan taken out and the action performed.

Now, I would bet against a 3 train being bought in OR3 but ... well, but. So if MR1 occurs after OR3 then we stop at that point, otherwise we will proceed to parse OR4.

SR1 ran as a supplement to Minstrel 360 and the action repeated here for the deletion of observers. This time there is a push through to the first 4 train leaving the majority of companies without a train ...

The OR5 operating order is - 1, 2, 3, 5, 6, 7, 8, 10, 11, 12, 13, SNCF, DR - unless changed by SR2.

GITCO & BRASS claim runs 8 & 15 as their own and then take the scoring places in run 16 ahead of BMX. BLOT, 4Lions & GRID then figure in run 17 with a tie for second place. 4Lions then absolutely storms run 18 against essentially equally lengthened opposition with a GRID just ahead of GITCO for second place. But it seems 4Lions used all his oomph in that last race as he slumps in run 19 and BRASS & GRID tie for first place. BLOT reappears to win run 20 and is the only non-runner for the last race which sees GRID defy the odds for first place with the clearly best routed BRASS taking second place and tipping the balance to make GRID the best earner by a bit over all the round 9 runs. Halfway through operations and 4Lions is out in front ...

This time it is John's turn to start auctions and buy nothing, but Dane does reassert his purchasing prowess with a couple of laboratories. I found that I was strangely nervous when interpreting some orders so best to check that you can see a correlation between your supplied orders and the outcome represented below.
