

The 18xx games are on page 2 onwards in order of starting. Then it is RR2188C on p16, Outpost M12 on p17, St. Petersburg M3 on p18, In The Year Of The Dragon M2 on p19 and The Games That You Play on p20.

New Games: The second Minstrel In The Year Of The Dragon starts this time.

Gosh but it's busy in the run up to Christmas this year! So it's another issue pushed out the door - and only happening now because my grandson has conked out. I think the 18xx games have had all the attempted and successful challenges that are needed. No chance to think about new games right now, and I won't make any New Year resolutions about changing Minstrel. I wish the best to all of you for the coming year.

ROUND 10

STARR made a late surge to snatch victory in run 22 from GITCO. But in run 23 no surge would have overcome GITCO who had an easy victory over the joint efforts of M&P and STARR. Late surging was back for run 24 as GRID gained equal first with M&P who had been in front throughout the race. Run 25 was a straight grunting win from the front by STARR with GITCO just edging out GRID for second place. M&P strolled to win run 26 as was expected and then STARR & GRID took runs 27 & 28, respectively, with insouciance that belied their slight route length advantages.

So, overall STARR gets that bit further ahead of GRID with M&P still in with a chance of making up a place.

Lyndon carries on flashing his cash to push through the trains so just after John gets full complement of trains David & Don are left with train-less companies. They both have enough cash to help fund replacement trains so no bankruptcies loom.

Lyndon - you missed 114 out of your suggested (thank you for that - you always help the GM) SLSF run and the SLSF did not have 204 credit so I had it play all its credit for the train purchase from the TP. Also the FW made its connection run in OR9 - it was detailed in the Notes but I did omit the usual "Connection Run" banner.

A quiet time as the most desired tiles are not available or were made not available. Tony spends exactly all his cash to help the C&O buy a diesel leaving Mike & David clear of the rest. There might not be any change of president in OR8 so let me ask for orders for SR8 and ORs 14 & 15 next time - but we will stop after SR8 if there is indeed any change of presidency within it.

The Start Packet was sold in its entirety. I am asking to go through to SR2 for next time but we will stop after SR2 if the ByE gets a new director or if the SxE is floated.

STARR made a late surge to snatch victory in run 22 from GITCO. But in run 23 no surge would have overcome GITCO who had an easy victory over the joint efforts of M&P and STARR. Late surging was back for run 24 as GRID gained equal first with M&P who had been in front throughout the race. Run 25 was a straight grunting win from the front by STARR with GITCO just edging out GRID for second place. M&P strolled to win run 26 as was expected and then STARR & GRID took runs 27 & 28, respectively, with insouciance that belied their slight route length advantages.

So, overall STARR gets that bit further ahead of GRID with M&P still in with a chance of making up a place.

We are ten players and all but one took the automated start - and it just so worked out that all the actions were as if all players had taken the automated start. Phase 3 will start when at least one player has 40 VPs.

John W starts round 3 as the player with the strongest average production - but will the cards reflect that? The persecution (both perceived and/or real) starts here ...

In order to avoid early unpleasantness we will do the initial pick of Persons by email. So I will ask Brad to pick followed by John, Pete & Mike whose brain strain will be reduced by knowing what pairs have already been taken. And just before we start, here is a reminder of the Person Types and of the Person Cards that you hold - a tick [✓] means that you still have the card for that person type and can choose them at the appropriate times.
