

The 18xx games are on page 2 onwards in order of starting except that 1830U34 is below, Outpost M12 is on page 12, In The Year Of The Dragon M2 is on p13 & p14 and The Games That You Play is on p15.

New Games: An 18EU is finally starting by email sent contemporaneously with this issue.

Another chance to say that there's no room to say anything. That's what I call a result.

**1830U34 / 2**

**SR2**

Mike B sets us on our way and every other player also gets a president's certificate. Three of the five putative companies will operate in OR3. We will stop after SR3 if there is any change of president (as in transfer of presidency and/or new presidency) during SR3. We will also stop after SR3 if a 3 train was bought in OR2. Just sayin'.

**Mike** Rats. I made an utter pig's ear of this game and finished exactly where I deserved. Hats off to whoever won it - I stopped worrying about who that would be a long time ago.

John nudges ahead of Mike but the game is not quite over ... but we can achieve that next time.

The 51 & 67 tiles disappear in a flurry before they can be used to connect the north & middle. Meanwhile it looks like other attempts to connect those areas trip over each other whilst the GNR & L&YR decide to base in the northern area.

The OR10 operating order is - CA, CGR, LPS, BBG, TGB, THB, WGB.

All orders were pretty straightforward, but even so a check to see that they were properly executed is recommended. As it is, two new companies were formed and that is not likely to change.

Only John had a real chunk of cash to splash in the SR courtesy of selling the C&A - which does mean that H18 can now be graced with an upgrade. Meanwhile it does seem that this game has twice the usual number of poison 4 trains. Next time it will be OR6 only by request.

Ah, I did not think about a 3 train being bought in OR when I asked for orders for this issue. David H & David R did do that and both provided orders for MR1. But by the time I did this game I knew that John was away so I could not ask him (and Don) for their MR1 orders. And all that was a long way of saying that we have stopped after OR5.
