

The 18xx games are on page 2 onwards in order of starting. Outpost M2 is on p 15, In The Year Of The Dragon M2 is on p16 & P17 and The Games That You Play is below.

New Games: A new In The Year Of The Dragon did start after last issue and a new 1830 starts below. After that the next new game contenders seem to be 1856, 1861 & 18EU. Register your vote if interested - sometimes I play GM and select a line-up that might not match the first listed first included principle. Typically this is either to get games for those with none or a few in preference to those with many. There have also been occasions where I have seeded games using an arbitrary sense of what's what. The other possibility is "by request" games such as the current three player 1835.

This issue has an unusual achievement by David Roffey - he goes bankrupt (as expected) in two games without finishing last in either of them, but does finish last in the third game that ends this time. Oh the humanity.

Toronto is blockaded to the west. The THB swings into service but doesn't look like it will enable George to catch Graham. I am assuming culmination next time - if you agree then please send any comments.

Tony Thanks to all for an entertaining and unusual game. I've never seen the LNWR bypass Birmingham before. Also, I don't think I've ever seen the L&YR running by OR7. This was mostly thanks to David, who forced the early pace in the SDRs. David seemed to be going along OK, but lost the plot when he chased after the GCR when it had no cash, with both his other companies also short of cash.

Once I stripped the GCR and regained control of the GWR, I was always in a strong position. Thanks to Mike, Pete and John for their co-operation.

Mike Congratulations to Tony, who played his usual hatefully immaculate game. Truth be told it was over the moment he secured the GCR to strip in favour of the ever-lovely GER. I made enough mistakes that second was all I deserved, but the slightly discomfoting thought is that had I got everything right, Tony would still most likely have won.

Pete First of all congrats to Tony for a well earned victory. My initial aim was to head south with the LNWR. I think that worked to an extent, but I need to be more ruthless with my companies in this game. In particular, circulating through the company share to get the one you want!

David What was I thinking? It seemed like a good idea at the time (but wasn't).

GM Thank you for those insights. "Entertaining and unusual" it may have been but Tony seems to be able to navigate all varieties of choppy water - plus there may be strong a clue in his thanks for co-operation. If that co-operation was knowing then communication rules!

Nobody bites on a new WtE so we get no nearer to the MsE and OIE. All operating companies are at their train limit so the primary considerations in the next ORs are tile lays and garrisons.

The OR9 operating order is - SLSF, ATSF, MKT, TP, FW, GMO, MP, SP.

The three 5 trains are bought in three successive operating turns. We pause after OR9 as requested (thanks to those that had sent orders before the news got out - they will be used if not changed).

The OR10 operating order is - C&O, Erie, B&M, PRR, CPR, B&O, NYC, NYNH - unless changed by SR7.

The CGR was formed with only the TGB having a choice on whether to be a part of it. The CGR took all the 4 trains offered which left the GW just managing to buy a diesel and the WR failing. An emphatic victory for Tim - any comments received will be printed next time.

The lack of 57 and 58 tiles slows track development - but the arrival of the 3 trains will generate action for the tile layers. Meanwhile there is no interest in the WtE and the ByE changes director.

NEXT TIME - OR3 & SDR4

A smooth start. George did order for the A-K in OR2 but I am sure that was a typo and not an attempt to subvert the GM. Well, fairly sure. I mean, let's face it, you just never know with George.
