

The 18xx games are on page 2 onwards in order of starting. Outpost M13 is below, In The Year Of The Dragon M2 is on p14 & P15 and The Games That You Play is on p16.

New Games: None. The 18xx games are operating on a “one out, one in” basis.

As we expect better weather (in the UK) we get some longer gaps between issues ... and this is one of them.

OUTPOST M13

ROUNDS 1 & 2

Once again we are at the maximum number of players and everybody took the automated start. Stephen & David bought a Water Factory in round 2 and that helps them be the two with the lowest predicted production for the next round. Stephen & David were also the only two players to buy a Water factory in round 2 of the last outpost game. Interesting eh?

Mike starts round 3 as the player with the strongest average production - but will the cards reflect that? The persecution (both perceived and/or real) starts here ...

Round 1 Actions

All Bought one Water Factory (o:{3},{3} w:{7},{7}) {} indicates the start average value cards.

Round 2 Actions

- John Bought one Population Unit (o:4 w:6)

DEADLINE : FRIDAY 13TH JUNE 2014

HOST : ROB THOMASSON

In OR11 the SP had both a 5 train and a 4 train when it ran. I did not show the departed 4 train in the report which explains why the run value looked high - but was in fact correct. This time many companies run for 270. One does it from the NW to the SE which I have never seen before - but then I don't get out a lot.

The OR13 operating order is - SLSF, ATSF, MKT, TP, FW, GMO, IC, SP, SSW, MP - unless changed by SR8.

So, we pause after OR13 by request. Meanwhile, the 4 trains have gone and our leader has to find and fund a train for the NYNH. I have asked for orders to go through to SR9 but we will stop after any OR that features a dividend retention or train purchase by any company other than the NYNH in OR14. That make sense?

The OR14 operating order is - B&M, PRR, C&O, CPR, NYNH, Erie, NYC, B&O.

Don - Your line-up of Minors & trains did not match either the truth or my mistaken record of last time so I adapted your clear intention to reality. Mike - The HeE did not have enough credit to place either of the bases requested. David R - Your orders did not anticipate there being a 3 train the bank and so I extracted the possible train purchase from your conditions. David H - All fine (apart from expecting that the SxE would have a 3 train). John - Masterfully correct order to convert the K-M to the PrE.

Mike started the CA in SR2 so we stopped after that round. For next time I am asking to go through to OR3 with the same possibility of a stop after SR3. That is - we will stop after SR3 if there is any change to the presidential line-up during SR3. So if we reach OR3 the companies & presidents will be the same as for OR2.
