This time the only Colony card bought is a Heavy Equipment and it is replaced by a Nodule.

You each have 300 dollars and form at this game. Commence deployment of said expertise ...

All companies ran as per last time and the player order was unchanged so David H takes it from John and Don.

David H said "I usually do not take advantage of running companies in the green, but the B&O may just help me eke out a win". No doubt it did – John was just \$5 behind at the end of the penultimate round, but David H had those 3 extra shares and they made sure that he increased that gap. Thanks to all for an engrossing game.

The OR1 operating order is - SLSF, SP, MKT.

Mike actually has three dragons but I only showed him as having two last time. In other erroneous reporting news, John is the first to act this time. In perverse news, when John finally gets to go first the option he wants is on its own so nobody else is hampered. In fact, everybody gets their first choice of action. The last Free Choices are made and Mike lurches forward to be the first to act next time.

Then, just to prove that it is random, we get the same pairs of actions as we have had for the last two turns. This occurrence did cause me check with the provider of my adjudication helper and also do a dummy run - which did give a separate pairing for month 11. So it is random but notable.
