

The 18xx games are on page 2 onwards in the order of starting. Outpost M14 is on p11 & St. Petersburg M4 is on p12. The Games That You Play is below.

New Games: 1870U39 is starting by email for David Hooton, John Shelley, Mike Bennett & Tony Bromley. I should now spend time sorting out the confusing plethora of possible 1856 combinations.

You know not to expect much from this sliver of text. If only there had been something happening recently that I could use as a springboard for insightful, and quite possibly pithy, commentary.

The OR15 operating order is - ByE, PrE, SxE, BaE, HeE, OIE, MsE, WtE.

The Receiver loses control of two companies. She still has control of the GCR and next time she will try to lay tiles in M7 and then L6. However, we will stop after OR15 if a 5 train is bought in OR15.

Mike formalises his expected victory. After celebrating by mounting the podium he spoke as follows:

I have always wanted to see what could be accomplished by the chain of minors between Paris and Berlin, but never been allowed to assemble all the components before. I think we can now say without fear of contradiction that it can prove rather profitable...

The OR5 operating order is - CPR, B&O, C&O, PRR, NYNH, NYC.

The Hannoversche still fails to find a buyer. Just in case it matters I will say that, in each SR, the Hannoversche is offered to George then David, Tony B, Tony S & Tim in that order. If someone buys it the SR continues in normal fashion starting with the player after the purchaser in the normal dealing order.

Next time I am asking for orders though to SR6 - but you just know that we will stop after SR5 if the Hannoversche is bought in SR.
