COMMENTS

John S * 1st One of those games where most of the things that I tried worked, I just wish that would happen more often or that I could work out how to make it happen more often. In the endgame having two trains with a network that permitted multiple routes between the same valuable cities was great and to my joy I found that the other companies around the area best interest was served by building track that helped me. Thanks to all who took part in the game and to Rob for running it.

David H * 2nd Congratulations to John on his victory - his getting two permanent trains into the CPR was definitely the winning move. Also, thanks to Rob for running it.

RAILWAY RIVALS RR2298DX

ROUND 3 [6,6,6]

Last time I did not credit MIKER 3 points for being first to reach Durham - now added to his score. This time the anticipated convergence happens in the mid-North with only minor payments. SHE & GITCO head for the Washington area and WEBBS infiltrates the Great Smoky Mountains.

John S * 1st

One of those games where most of the things that I tried worked, I just wish that would happen more often or that I could work out how to make it happen more often. In the endgame having two trains with a network that permitted multiple routes between the same valuable cities was great and to my joy I found that the other companies around the area best interest was served by building track that helped me. Thanks to all who took part in the game and to Rob for running it.

David H * 2nd

Congratulations to John on his victory - his getting two permanent trains into the CPR was definitely the winning move. Also, thanks to Rob for running it.

Mike completes his crushing victory and comments ...

“Lucky old me. I’ve only ever seen someone allowed to get all the Data Libraries once before, and the result was the same as here. Moral of the story, chaps; don’t let it happen again!”

Ian leads the pelotonic chasing gang of 4 to claim second place.

I do not have the will or the energy to list the cards now held by each player.
