

1829E41, 1870X41 & 1830A42 are on pages 2, 3 & 4. RR2362EA is on p5 and St. Petersburg M5 is on p6. The Games That You Play is below.

New Games: An 18EU is starting by email for the four on the waiting list.

I have had no updates on George and Ian was not able to send orders. I also know that there a couple of other players that have some degree of issue at the moment. I have set a normal deadline but will be in touch as necessary on developments as we near that date.

Meanwhile, John S has kindly offered to act as a “Temporary George” in 1835J41 & 1856W41 if necessary.

Meanwhile, in more mundane news, and based on feedback from Tony S & John S, I have removed the sidebar from the new look website. At some browser widths the sidebar overlaid some of the maps and wrangling the shifting elements for all widths was a chore too much. So I have changed to a top line navigation bar which I think is an improvement over the sidebar version in any case.

```
int getRandomNumber()
{
    return 4; // chosen by fair dice roll.
              // guaranteed to be random.
}
```

Steady in preparation. Hmm, okay, I will ask for orders through to SR4 with the proviso that we will stop after SR3 if a company is floated in SR3 and/or a company changes president in SR3 and/or a 3 train is bought in OR2. I think that the most likely candidate to cause that pause is John ... but who really knows?

There must be a song that SLOWEST & GITCO could sing to each other as they travel on their tandem through East Anglia ...

Underlined towns indicate first arrivals and earn points for the incoming railway(s). Underlined hex identifiers are inferrations or corrections. The fact that the hex numbering increases northwards up the map seems to be counter-intuitive.

Building Allowances

The building allowance for each of rounds 1-6 will be derived from three die rolls in the range 3 to 6 with no one round ever having more than one roll of 3. The building allowance in round 7 will be 12 points (plus payments to rivals) and will then decrease by 2 for each subsequent round.

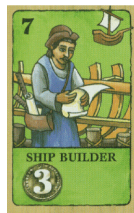

Next time ... let us work on both Workers and Buildings ...
