

The 18xx games are in order of starting from p2 onwards. Railway Rivals RR2416NIL is below, Outpost M17 is on P9, Puerto Rico M1 is on p10 & p11. The Games That You Play is on p11.

New Games: Puerto Rico M2 starts on p12 for the five on the waiting list. The ever-anticipatory 1861 trio are still waiting at the brink and when 1830A42 finishes next time there may be activity on the 1830 waiting list.

Last time Brad was the Captain and not the Craftsman as reported. Mike thought I had missed some entries in the Mayor & Settler reports but I am not convinced. Maybe it is just that I did, and will again, omit to mention those who pass. We both agree that the displays were correct.

This time we end with no goods in player hands.

Welcome to the second Minstrel Puerto Rico. Your player order is John Webley, Brad Martin, Mark Hancock, Mike Ruffhead, Mick Haytack.

Each time you will need to send orders for a whole round with sufficient conditions to cover all the eventualities - covering your own preferences for role and associated action, plus what you would like to do for each other player's role. An overall statement of intent will be very useful and I would use that to resolve any gaps in your orders. The first game settled in quite quickly.

Please survey the information below and raise any queries about the presentation or meaning. The first sections are player information - currently the same for John, Brad & Mark who start with an Indigo Plantation and for Mike & Mick who each have a Corn Field. If a plantation has a colonist working it then the plantation space will be marked with a "c" instead of the current "-". Similarly the building spaces below the list of player plantations and goods will be marked with one or more "c" as they gain colonist(s).

The colour coding for goods is in the expected order of Corn, Indigo, Sugar, Tobacco and Coffee - you can double-check the colour by looking at the list of buildings.

In the general game information the + values after each role are for the number doubloons added for it not being chosen in previous rounds. As the cargo ships fill they will have a colour for the good on board and a number for how many. The available plantations, goods and Trading House spaces are (or will be) coloured for the relevant good - obviously only the places in the available goods section need a number. The buildings can each accommodate one colonist unless noted by "2c" or "3c".

If you need to refresh yourself on any building, or on any other aspect of the game, then two references are [the rule book](#) and [Keith's website](#). Any queries ... just let me know.
