

The 18xx games are in order of starting from p2 onwards. RR2515BO Bolivia is below, Outpost M19 is on p7, St. Petersburg M7 is on p8, In The Year Of The Dragon M4 is on p9 & p10. The Games That You Play is on p10.

New Games: No waiting list changes so no change in the likelihood of a new game.

This time I am filling the space on this page with some questions that you can ignore with impunity ...

- What are the next two numbers in this sequence ... 6, 24, 60, 120, 210, ..., ...
- Four ordinary six-sided dice are rolled. What is the probability of rolling a prime number of prime numbers?
- A woman, or possibly a man - we can't be sure, went up a hill at the rate of one and a half miles per hour and later came down the hill (using the same route) at the rate of four and a half miles per hour. Their total travelling time (which obviously excludes resting and any other activities undertaken at the summit) was six hours. How long is the route to the top of the hill?
- A group of people have eaten a meal together and have received a bill for their total spend. If each person pays £8 then they will have £3 too much. If each person pays £7 then they will be £4 short. How many people are in the group and how much was the bill?

Last time I showed Mike as having a Warrior 2 in his Palace 1 rather than the correct Courtesan 1. It is easy (and often dangerous) to get those two confused in my experience. This time some languishing Pyrotechnists are recruited and housed purely for their bodies and with no regard to their skills.
