

The 18xx games are in order of starting from p2 onwards. Railway Rivals RR2530VS is on p8, Outpost M20 is on p9, St. Petersburg M8 is on p10. The Games That You Play is below.

New Games: An 1835 starts below for five people, Five! In one game! We haven't seen the likes of that for many a moon. Beyond that - no other starts are threatening. Apart from maybe an "earlier than would normally be the case" Railway Rivals.

I have not remembered that thing that I thought of last time. Hey ho. But the sun is shining ...

The LNWR & LSWR enter receivership. The LBSC flirts with it but avoids that state. The GCR is floated.

The LNWR Receiver will try to improve existing stations and create a route from J4 to L5. So the likely action in OR11 is to lay 20 : K5 : 1. In the absence of those two opportunities the LNWR will build towards London. The LSWR Receiver will try to improve existing stations and improve route. So the likely action in OR11 is one of 9 : C9 : 3 and 38 : C10 : 4.
